

Two-Layer Model of Cyber Operations in the Russia-Ukraine War

DATABASES:

CISSM
(N=335)

CSIS
(N=82)

CFR
(N=26)

SURFACE LAYER

CISSM (OSINT)

- Hacktivist DDoS / defacement
- Self-attributed / publicly claimed
- Observable in real time

- Captured by OSINT collection
- Dominates CISSM database (52.8% self-attributed)
- Episodic, reactive, expressive

CSIS / CFR
(curated)

SUBSURFACE LAYER

- State APT / espionage / sabotage
- Anonymized / deniable
- Covert, persistent, strategic

- Captured by curated intelligence
- Dominates CSIS/CFR databases (84.6%+ state)
- Low-volume, continuous operations
